# MicroAge Monitoring Services

Fuel Smarter Business  
Operations

Propel your business operations forward with deeper visibility across your environment—both on-premise and on the cloud. Fuel efficiency and work smarter with MicroAge Monitoring Services, pinpointing and mitigating potential dangers before they create issues.

## With MicroAge Monitoring Services, you can:

- Unleash control and visibility from on-premise to the cloud
- Prevent unnecessary outages and improve mean time to recovery
- Avoid overspending by eliminating multiple providers from your approach
- Support cloud environments and SLAs with visibility and user alerts
- Access more than 2000 out-of-the-box integrations
- Rely on up to two-years in data retention—available in seconds
- Automatically detect, monitor, and receive CPU, Memory, Network alerts and more
- Navigate changes and best practices with our team of experts

## MicroAge Monitoring Services includes monitoring for:

- Applications
- Database
- Remote Monitoring
- Configurations
- Infrastructure—Network, servers, and storage
- Websites
- Cloud

## What's the MicroAge Difference?

Let our team of monitoring experts help you empower smarter business operations with our highly-available and always-on monitoring services. MicroAge monitoring services makes it simple to deploy and add new devices on the fly while freeing your IT team up without the burden of maintaining complicated monitoring platforms.
