

# Introducing the Monitoring Maturity Assessment

Do you struggle with a lack of visibility across your environment?  
Do important notifications get lost with an unchecked alert process?  
Are you struggling with planning your upcoming cloud-migration initiatives?

**If you answer “yes” to any of these questions, it's time to reevaluate your monitoring platform.**

With **MicroAge** experts, you can identify improvement areas by navigating your current monitoring strategy's strengths and weaknesses. A deep dive pinpoints the influence and daily impact your monitoring tools—both on-premises and on the cloud—have on your operations workflows.

The MicroAge Monitoring Maturity Assessment is a powerful tool to evaluate your current monitoring approach and how it supports your everyday business operations. The assessment uses targeted questions to guide you through the discovery to a final, calculated score, and includes a comprehensive report with actionable findings.
