

STATS WILL CHANGE HOW YOU THINK ABOUT NETWORK MANAGED SERVICES PROVIDERS

ALMOST HALF

Of businesses leverage MSPs for outside skillsets

27.5%

IT Services Share of overall market

\$1.03 TRILLION

Global IT Services Spending Projection for 2021

TRANSFORMATION VIA DISRUPTION

Covid-19 accelerated digital transformation as organizations change their approach to business. Gartner predicts digitalization will make enterprise software the fastest growing IT sector in 2021, growing 7.2%

The connected workforce has changed the way we work and manage technologies and infrastructure. Going remote has also made more security risks a factor for organizations while ransomware attacks grew more than 200% last year—and organizations can now be sanctioned for paying to get their data back.

THE FUTURE IS NOW

80%

Businesses plan to maintain or grow their IT investment

36%

Businesses plan to improve IT operations and systems

53%

Growth in cloud, data, and mobility strategies supported by MSPs

99.9%

Your network can be monitored 24/7/365 for guaranteed 99.99% uptime

65%

IT budgets are spent keeping the lights on, with an MSP you can strategically reallocate technology investments to support growth.

Cloud & managed services spending will increase while hardware spending declines
