

SMART Board™ 800 series interactive whiteboard system

Create a more collaborative and engaging classroom for your students with the combination of a SMART Board 800 series interactive whiteboard and a SMART digital projector.

Choose the projector that best suits your needs

U100

UF70

The ultra-short throw U100 provides clear, dynamic images with 3,600 lumens brightness, is HD-ready with dual HDMI and USB connectivity and comes in two models to support both widescreen and standard interactive whiteboards.

The short-throw UF70 provides 3,000 lumens brightness, is HD-ready with single HDMI connectivity and comes in two models to support both widescreen and standard interactive whiteboards.

Key features:

Excellent image quality

Projectors use DLP® BrilliantColor™ Technology from Texas Instruments to produce high levels of brightness and contrast.

Multitouch experience

Four users can simultaneously write, perform mouse functions, erase and manipulate objects.

Freestyle interaction

Each user can individually complete actions, like writing in digital ink or moving objects with their fingers, without the need to switch to a multiuser mode.

Object awareness

Cameras automatically identify when a user switches between their finger, fist or a pen. A user can also write with a pen, erase with a palm and move objects with a finger, without having to press buttons, access on-screen menus or replace tools in the Pen Tray.

Touch gestures

Toss, rotate and interact with objects while using SMART Notebook software. Includes built-in support for multitouch operating systems such as Windows® 7, Windows® 8 and Mac® OS X.

SMART Notebook collaborative learning software

This software creates engaging interactive lessons, and then saves notes and content from those lessons to share with students. It provides a common platform for linking classroom technologies and student mobile devices.

SMART Ink™

Improves the legibility of handwriting over applications, websites and videos. Ink also becomes an interactive object that can be moved and manipulated.

Long-lasting lamp

SMART projectors offer excellent lamp life to reduce classroom downtime and maintenance costs. For example the SMART U100 projector lamp provides up to 6,500 hours in economy mode.
