Next-generation endpoint and remote office data protection

As an IT professional, you know the importance of keeping your corporate data safe. The critical task of data backup can be an expensive and challenging endeavor for large businesses. But these days, backup isn't enough. Quick and simple access to that data is also critical.

MozyEnterprise makes data backup and restore for computers and servers simple to manage and easy to use. With a simple and affordable per-user license model, Mozy saves you time and money with an enterprise-grade data backup solution that doesn't take months to set up, require thousands of dollars of new hardware costs, or force you to hire more administrative overhead. MozyEnterprise gives you the flexibility to deploy and manage multi-user environments from the convenience of a single multi-tenant, web-based administrative console.

MozyEnterprise not only seamlessly protects endpoints and remote offices, it works hand in hand with Mozy Sync and the Mozy mobile app. With Mozy Sync, users simply place their files in their local sync folder and they're immediately available from any computer or laptop. And the Mozy app for iOS and Android devices lets users access their important files from their smartphone or tablet, making access easy. File sync and mobile access allow your workforce to work anywhere by giving them the flexibility to securely access all of their important files in real time—and it's a great way to boost workforce productivity.

Whether you're the CTO of a Fortune 100 company or an IT consultant working with a large company, MozyEnterprise is a powerful solution for endpoint data backup. Mozy is backed by EMC so you can be confident that your company data is safe, secure, and available.

Tools that give you control

The MozyEnterprise web console allows the IT administrator to:

- Easily manage backup, sync, and mobile access for thousands of end users
- Create sub-administrators
- View account usage, history and stats
- Generate and email reports automatically

- Reset account passwords
- Integrate with Active Directory and other identity providers
- Change account status
- Activate new users
- Customize configuration settings
- Manage end-user settings

Designed with the end-user experience in mind

With the MozyEnterprise client, end users can:

- Sign in once through Active Directory credentials
- Select files and folders to back up
- Set up a Mozy Sync folder to keep their active files updated across multiple devices
- Set automatic and scheduled backups
- Configure options and bandwidth throttling
- Enable local backup with Mozy® 2xProtect™
- Enable on-demand backups
- See a history of all backups
- Restore files and folders
- Change account status

MozyEnterprise backs up server-specific applications, including:

- Network shares
- All versions of SQL and Exchange
- SharePoint
- Active Directory
- Com+ services
- SYSVOL directory share
- Windows Registry database
- Supports Windows, Mac, and Linux servers

Support

- **24x7x365 Support:** Access to around-the-clock email and phone support with expert technicians.

MozyEnterprise feature set

Fast

- **Data seeding:** Move 200 GB or more to the cloud quickly with Mozy® Data Shuttle™.
- **File scanning:** Back up millions of files effortlessly with advanced file scanning.
- **Block-level incremental backups:** After the initial backup, MozyEnterprise only backs up new or changed portions of files, saving bandwidth.

Simple

- **Backup, sync, and mobile access together:** Protect end-user data and boost productivity securely.
- **Easy account management:** Manage multiple users with a multi-tenant, web-based administrative console.
- **Simplified storage management:** Devices draw from a single pool of storage at the organizational level, so you don't have to assign storage to every single device, saving you time and reducing administrative burden.
- **Set up user groups:** Organize users into meaningful groups by profile, space usage, feature availability, backup configuration and more for easier administration.
- **Federated Identity integration:** Automatically trigger user creation, organizations and removal in MozyEnterprise through Active Directory or other identity providers.
- **Single Sign-on:** End users log on with Active Directory credentials.
- **Custom installations:** Choose from user-assisted, background, and silent installation options through your software management system of choice.
- **Automatic or scheduled backups:** Back up automatically or to a schedule you choose.
- **Custom configurations:** Set policies on bandwidth usage and backup speeds, create custom backup sets, or define what file types should be backed up.
- **Reliable data restores:** Browse and search your backed up files, then restore file versions up to 90 days in the past in multiple ways, including the web, software client, or by ordering a DVD restore.

- **Local backup:** Windows users can back up locally to an external device as well as online for double protection with Mozy 2xProtect.
- **Standard and customizable backup sets:** Use pre-defined backup sets of common file types, or create your own backup sets.

Secure

- **Encryption:** Backup and sync data is encrypted locally with military-grade encryption prior to transfer. Choose a managed key, personal key, or corporate key for added security.
- **World-class data centers:** Mozy data centers employ state-of-the-art security with 24x7x365 onsite monitoring and security, fire detection and suppression systems, redundant power distribution units, and employ the highest security standards.
- **Maintain regulatory compliance:** Mozy helps companies comply with standards such as HIPAA, European Safe Harbor, PCI, DSS, BDSG, and more.
- **Audits and certifications:** Mozy has successfully completed an SSAE 16 audit and is ISO 27001 certified.

Scalable

- **Back up computers, servers, and NAS:** MozyEnterprise backs up laptops, desktops, NAS, and mission-critical data on multiple servers, including SQL, Exchange, and other file servers.
- **Open and locked file support:** Our service backs up all open and locked files, including Outlook PST files.
- **Version (snapshot) support:** Restore from file versions up to 30 days in the past.
- **Mobile app:** Access stored data from any iOS or Android device with the free Mozy mobile app.
- **Windows, Mac, and Linux support:** MozyEnterprise supports Windows 7, 2008, Vista, XP, and 2003, 2012 (desktop/server); Mac OS X 10.8, 10.7, 10.6, 10.5, and 10.4 (desktop/server); and Linux servers (headless client).

Network Usage

- **Single-instance storage:** Duplicate files across your environment are only backed up once, saving bandwidth.
- **Bandwidth throttling:** Define the amount of bandwidth used all the time or between specific intervals.
