

MicroAge Windows 365 Cloud PC Services

The Future of VDI has Arrived

Now you can securely stream your windows experience—personalized apps, content, and settings included—from the Microsoft cloud to any device with your Windows 365 Cloud PC. MicroAge cloud engineers are ready to guide you to empower more value and flexibility for your organization’s BYOD strategy, keeping your connected workforce and contractors aligned in lockstep for collaboration and peak performance. From freelancers to industrial engineers and interns to field sales executives who need access across multiple devices, with Windows 365 you can promote agility and performance across a virtual, modern workplace.

With MicroAge Windows 365 Cloud PC Services, you can:

- Keep contractors and temp workers securely and actively collaborating with your connected workforce without data saved to the device
- Access a highly available, optimized, and scalable virtual machine end-user experience with Windows desktop
- Empower a personalized Cloud PC experience for each user from their unique device
- Stream your apps, data, content, and settings to any device from Microsoft Cloud
- Seamlessly manage Cloud PC users from the Microsoft Endpoint Manager, including deploying and provisioning packages or a Microsoft-provided gallery image

Find the right Windows 365 Cloud PC Services plan:

Each package includes a dedicated project manager, implementation via Endpoint Manager and Azure vNet connection to on-premise, Cloud PC subscription with M365 E3, monthly billing, and 24/7/365 U.S.-based Tier 1 support. Our award-winning team of Microsoft-Gold certified cloud experts work with you to assess, strategize, and architect a secure BYOD strategy moving forward.
