

# SD-WAN Services: Conquer your IT Roadmap with Greater Network Flexibility

The server virtualization trend that started decades ago has sparked a "software-defined everything," or SDx approach. In today's disruptive digital age, more businesses increase efficiency, mitigate risks, and lower costs by actively leveraging software-defined solutions to eliminate unnecessary network complexity. With MicroAge Communications experts, you can harness SD-WAN on the cloud for greater management control to seamlessly connect multiple data centers and improve network security.

With MicroAge, your SD-WAN approach empowers you to make the calls on your network type and valuable add-on services, including firewalls for an extra layer of protection.

## MicroAge Communications experts help you unleash network results so you can:

- Gain control with deeper network intelligence and visibility, greater accuracy in traffic management, and more predictable policy and patching application with Software as a Service (SaaS)
- Streamline your IT roadmap while increasing security with solutions to deploy across most of your technology stack—including VMware SD-WAN (VeloCloud), Cisco Viptella and Meraki, Fortinet, and more.
- Make efficiency gains around automated network provisioning, centralized network management, Quality of Service (QoS), with augmented flexibility and scalability
- Promote a stable, secure SD-WAN approach utilizing DMPO (Dynamic Multipath Optimization, Forward Error Correction, and including vast firewall features (SASE) all with a cloud based dashboard so you're never out of touch.

## Defining an SD-WAN strategy forward can help companies:

- Reduce WAN costs and simplify branch office deployments
- Enhance application performance traversing the WAN
- Better evaluate bandwidth and WAN environment control goals
- Navigate increasing network visibility and business intelligence

## Discover a more secure and flexible network experience.

No matter what your network goals, the Communications experts at MicroAge can help you drive agility, security, and deeper insight and control across your network. Contact your Account Executive, call [\(800\) 544-8877](tel:8005448877) or visit [MicroAge.com](https://MicroAge.com) to get started.
